TECHNICAL SECTION
READING GUIDE

#1 INSTALLATION TYPES

The Barazza products are available with different types of edges and installations. For the legend, see the flap on the right.

#2 TECHNICAL SPECIFICATIONS

The description includes all the technical characteristics of each specific product. All the common standard supplies are listed at the bottom of the page.

#3 PRODUCT CODE

The code allows an instant product identification and is compulsory during order formulation.

#4 ACCESSORIES

Each Barazza product comes with a series of functional accessories such as stainless steel sink covers, polished steel baskets, iroko or polyethylene chopping boards and colanders, designed to improve work in the kitchen. For additional information, please consult the Accessories chapter on page 229.

#5 PRODUCT PLUS

Icons indicate the main and unique features of each product. For the legend, see the flap on the right.

#6 BASE UNIT

The term base unit stands for the smaller module where the product can be installed.

#7 TECHNICAL DRAWING

The technical drawing displays product dimensions and technical specifications. Cut-out dimensions for built-in installations are indicated in the text. For flush and undermounted installations, please consult the technical data available on the company Web site www.barazzasrl.it.

#8 MIXER TAP HOLE

The Barazza sinks come with a 3.5 cm hole for the tap, thus eliminating the need to drill a hole through the kitchen top. Many models may be customized upon request at the time of ordering, adding a second or third hole which are required for the addition of a remote control or, alternatively, of the practical soap or detergent dispenser. The optional holes are shown in the technical drawing with a dashed line.

and brimming with details
and technical data, Barazza 2015
catalogue is ideal for selecting
the collection of products
that best suit your day-to-day
requirements for your kitchen.

BARAZZA
taste of design
2015

100% ITALIAN CONCEPT AND CREATIVITY.

For almost fifty years Barazza has been designing and manufacturing exclusive products with matching styles, combining Italian design innovation with the ability to provide cutting-edge tech solutions to day-to-day needs. Its products have been designed for consumers who take care of taste trends and quality of Made in Italy products. Italian manufacturing, recognized for its best-of-class excellence by the global markets, represents the finest combination of quality and style, comfort and technology. In order to meet particular size and composition needs, Barazza is also able to give steel infinite forms, by combining cooking or washing elements into products of various personalized sizes and finish, and thus obtaining new custom-made solutions.

CUTTING-EDGE TECHNOLOGY: RESEARCH AND DEVELOPMENT

All Barazza collections are products of scrupulous R&D work carried out exclusively at the in-house laboratory, which is the company's creative heart. The entire production process is then performed using new-generation technological systems which are key to the company's ultimate aim: the creation of ergonomic products with high quality standards and performance.

BARAZZA, NATURALLY GREEN

Barazza operates with an eco-sustainability logic using systems and materials that offer great energy savings and reduced environmental impact, for the benefit of future generations. AISI 304 stainless steel, with its high content of chromium and nickel, is a fine example of ecological sustainability, as it is completely recyclable, hygienic, durable, resistant to corrosion and devoid of toxic emissions.

BARAZZA, A STAINLESS COMPANY

Barazza is not just a brand of household appliances, but first and foremost a family name of Italian entrepreneurs who for generations have manufactured high-performance and high-design appliances, devised and created in their own workshops, employing painstaking skill and innovative technical approach. Barazza company headquarters, established in 1968 in Santa Lucia di Piave, at the so-called Stainless Steel Valley, comprises production plant, offices, research and development laboratory, a large showroom and an area dedicated to active kitchen for cooking events.

CROSS COLLECTIONS

All Barazza appliances share the unique quality of being modular, fully matching stylistically, all in line with the brand's prime concept: to create a coordinated kitchen environment. Within the cross collections, Barazza offers, for example, cooker hoods, induction or glass ceramic hobs, microwave ovens, EASY, B_OPEN and B_FAST sinks, square bowls and accessorised channels.

COOKER HOODS

An exclusive collection of Barazza COOKER HOODS made entirely of high-thickness stainless steel. High performance is assured thanks to the use of innovative, powerful and silent engines. Lighting with LED light bar completes their elegance and functionality. The pure and contemporary design allows an optimal matching with the entire range of Barazza products.

REAL TIME CONFIGURATORS

By combining the cooking and washing elements with custom finishes and dimensions, new and most exclusive solutions are obtained. A huge variety of options is offered online and in real time using the new LAB FUSION and B_FREE FUSION CONFIGURATORS, choosing among the various types of available hobs and bowls.

LAB FUSION

The design of the LAB FUSION systems is synonymous with elegance and functionality. You can choose among various types of LAB hobs and SQUARE BOWLS and create a unique custom worktop with lowered elements installed either as flush or built-in. The cooking and washing elements, aligned to the same level, allow the sliding of steel grids and chopping boards. All of this gives added utility and allows you to easily clean the surfaces.

LAB FUSION FEATURES

#1 BUILT-IN AND FLUSH INSTALLATION

A custom worktop can be installed as built-in (with a flat edge) or flush (achieving perfect alignment to the top).

#2 BOWLS R. "15"

Bowls with radius "15" characterised by a design that permits an easily cleaning.

#3 SLIDING CHOPPING BOARD

The sliding steel chopping board, usable over the entire unit's length, is a useful and practical tool during both preparation and cooking, and may be customized to satisfy specific needs.

LAB FUSION CONFIGURATOR

The LAB FUSION CONFIGURATOR, which is available online at www.barazzasrl.it, allows you to create your own worktop by choosing among different types of available hobs and bowls.

FLUSH PAN SUPPORTS AND INTEGRATED BURNERS

The stainless steel or cast iron integrated burners and flush pan supports transform the hob into a never-ending surface: it also allows you to move cooking instruments without having to pick them up, becoming a supporting surface.

Barazza offers a wide selection of OVENS that perfectly matches its hobs and sinks, to fully meet any cooking needs. Barazza OVENS come in different types: multifunction, pyrolytic, combi-microwaves, microwaves. Barazza OVENS are also equipped with multiple control solutions: knobs, digital programmers, Touch Control and 16-million colour Touch Screen display.

OVENS
TYPES

60 CM MULTISEVEN OVEN

Electric oven, 6 manual cooking functions and defrost function with top and bottom heating elements and fan.

60 CM MULTIFUNCTION OVENS

Electric oven, 8 manual cooking functions and defrost function with top and bottom heating elements and fan.

60 CM MULTIPROGRAM OVENS

Multifunction electric oven, 8 manual cooking functions and defrost function. The digital programmer manages and allows you to program the cooking cycle with automatic start/end cooking; it also acts as a clock and buzzer.

60 CM MULTIPROGRAM PYROLYTIC OVEN

Multifunction electric oven, 15 manual cooking functions. The Touch Control programmer with Touch Control commands manages and allows you to program the cooking cycle with automatic start/end cooking; it also acts as a clock and buzzer. The pyrolytic function, with a high-temperature cycle, eliminates food residues.

60 CM TOUCH CONTROL MULTIPROGRAM OVENS

Multifunction electric oven, 10 manual cooking functions and 16 automatic cooking programs. The Touch Control programmer acts as a clock and buzzer; it allows you to program the cooking cycling with automatic start/end cooking.

60 CM TOUCH SCREEN MULTIPROGRAM OVENS

Multifunction electric oven with Touch Screen display in 16 million colours to manage functions by touching icons. 10 manual cooking functions, 16 automatic cooking programs, 36 cooking programs can be saved. Software in 8 languages for setting and customising programs, following instructions and self-diagnostics.

90 CM MULTIPROGRAM OVEN

Multifunction electric oven, 8 manual cooking functions. The digital programmer, which manages the cooking cycle, acts as a clock and buzzer; it allows you to program the cooking cycling with automatic start/end cooking.

OVENS
TYPES

MICROWAVE OVEN

Electric microwave oven, 9 manual cooking functions and automatic programming for 8 food types. It allows you to evenly and rapidly heat, defrost and grill.

45 CM COMPACT COMBI-MICROWAVE OVEN

Multifunction electric oven, 9 manual cooking functions and 12 automatic cooking programs. It joins microwave cooking and traditional cooking together.

60 CM AND 90 CM MULTISEVEN, MULTIFUNCTION AND MULTIPROGRAM OVENS

MANUAL COOKING FUNCTIONS

Static oven

Top heating element + bottom heating element. For any dish, particularly suitable for baking cakes, pizzas, roasting and timbales/puddings.

Warming oven/heating dishes

Bottom heating element. Warming biscuits, tarts and savoury pies. Heating dishes.

Browning oven

Top heating element. Browning dishes, in particular, lasagne, pasta and vegetable timbales.

Grill

Central top heating element. Meat of small to medium thickness and toasting bread.

Grill and rotisserie (2 operating levels)

Central top heating element+ rotisserie. It is recommended for cooking all meats on the rotisserie.

Fanned grill

Central top heating element+ fan. Meat of large thickness and dishes that are particularly voluminous.

Fanned grill and rotisserie (2 operating levels)

Central top heating element + fan + rotisserie. It is recommended for cooking voluminous meats on the rotisserie.

Fan assisted oven

Top heating element + bottom heating element + fan. Rapid and even cooking. Also recommended for biscuits and pastries.

Pizza/bread and rapid heat up

Circular heating element + bottom heating element + fan. Reduced combination cooking times; the oven is heated in just few minutes. It is also ideal for cooking bread and pizza.

Fan assisted multilevel oven

Circular heating element+ fan. It allows for cooking similar or different dishes arranged on up to three shelves.

Defrost function

Rapid and optimal operation.

Keep warm function

It maintains a constant temperature of 80°C. It is available with VELVET and Touch Control multiprogram ovens.

CUSTOMISED AND AUTOMATIC COOKING PROGRAMS

VELVET Touch Screen and Touch Control multiprogram ovens, in addition to the 10 manual cooking functions, have 16 automatic cooking programs. Once you have selected the function, the relative cooking mode automatically activates. With VELVET Touch Screen ovens, it is also possible to save manual cooking functions and combinations; it is possible to save a list of up to 36 customised cooking programs.

Pizza and bread

(frozen pizza, home-made pizza and bread)

Flans

(lasagne, pies)

Meat and fish

(roast pork, veal, lamb, chicken, whole fish, fish au gratin)

Cakes

(sponge cake, tarts)

Vegetables

(roast potatoes, grilled vegetables, tomatoes au gratin)

60 CM AND 90 CM MULTISEVEN, MULTIFUNCTION AND MULTIPROGRAM OVENS

GENERAL FEATURES

ENERGY RATING

All Barazza ovens belong to Energy Rating A: maximum efficiency for performance optimisation and energy saving. Barazza works focusing on eco-sustainability, using environmental resources with future generations in mind.

TRIPLE HEAT REFLECTING INTERNAL GLASS

This ensures that as much heat as possible remains inside the oven, limiting heat loss to external surfaces and keeping the temperature well below regulatory limits, therefore reducing energy consumption and avoiding a situation where children may burn themselves, upon accidentally touching these surfaces. (*)

100% GLASS INNER DOOR WITH REMOVABLE GLASS

It is made from just one smooth surface that facilitates cleaning operations. The door can be removed to access the glass sheets simply by undoing two screws.

DROP-DOWN GRILL

The 60 cm drop-down grill makes cleaning the top of the oven cavity extremely easy. (*)

CAPACITY AND 6 COOKING LEVELS

Composed of a non-deformable body without visible welded parts, the 65 litre cavity for 60 cm ovens allows to improve cooking times and subsequently electrical energy saving. 6 positions allow you to simultaneously place several dishes in the oven or cook large quantities of food.

EASY CLEAN OR STAINLESS STEEL OVEN LINING

The vitreous structure of the Easy Clean enamel makes the surfaces perfectly smooth so that cooking grease and oils simply slide off for easy cleaning. With some models, the oven lining is available entirely in 18/10 type stainless steel. The soft hinges facilitate the door opening and the interior lights make monitoring the contents of the oven easier.

INTERNAL SHELF STABILITY

The side racks give stability to the shelves and make it safe to check dishes. They can also be equipped with telescopic oven rails. (*)

COOLING SYSTEM AND TANGENTIAL COOLING FAN

It maintains external temperatures within the limits as defined by the safety standards. The tangential cooling fan activates upon oven activation and remains on until the oven is turned off; it normalizes the temperature by producing a flow of cold air.

60 CM AND 90 CM MULTISEVEN, MULTIFUNCTION AND MULTIPROGRAM OVENS

OPTIONAL ELEMENTS

PIZZA PLATE

Plate made of refractory material ideal for pizzas, fancy breads and frozen foods.

PYREX BAKING TRAY

As well as being resistant to impact and to high temperatures it has an elegant shape that makes it suitable for use as a serving tray. Available with 60 cm ovens. (*)

TELESCOPIC OVEN RAILS

Food and cooking instruments are easier to handle and remove thanks to a locking device at the end of the run. (*)

SELF-CLEANING PANELS

The oven is available with self-cleaning panels whose surfaces exploit the effect of the heat in order to start up an automatic cleaning process: grease is turned to ash that can easily be removed with a damp cloth without the use of detergents. If necessary, the panels can be easily removed. (*)

MICROWAVE OVEN LIFT-UP DOOR

Designed with a minimalist style, perfectly coordinated to every Barazza oven design; thanks to this lift-up door, the microwave oven can not be seen.

EXTRACTABLE WARMING DRAWER

The useful warming drawer can be placed under all 60 cm Barazza ovens. It keeps dishes warm, defrosts, allows dough/mixtures to rise, provides delicate cooking and rapidly warms tableware.

(*)Excluding Officina ovens.

VELVET

The VELVET collection is characterised by minimalist, elegant pure design, in perfect aesthetic harmony with any household appliance and modern choice of furniture. VELVET combines technological excellence and stylistic refinement.

VELVET TOUCH SCREEN OVENS FEATURES

TOUCH SCREEN DISPLAY

The Touch Screen display, with its 16 million colours, is an interactive system that gives you intuitive control of VELVET ovens' many functions by simply touching the appropriate icons. A marvel of technology that is extraordinarily easy to use thanks to the "intelligence" of the software that lets you set and customise programs, follow instructions and diagnose any possible problems. All of this in the language you choose from the 8 available.

USB PORT

It allows you to update the software, enter recipes and upload images in order to customise the Touch Screen display. You can download updates from the VELVET products section on the Barazza website.

FUNCTIONS

Manual cooking functions

Static oven, warming oven, browning oven, grill, fanned grill, fan assisted oven, pizza/bread and rapid heat up, fan assisted multilevel oven, defrost function and keep warm function: 10 manual functions with programmable duration and stop.

Automatic cooking programs

In addition to the 10 manual cooking functions, VELVET ovens have 16 pre-set cooking programs: *Meat and pizza* (frozen pizza, home-made pizza, bread), *Meat and fish* (roast pork, veal, lamb, chicken, whole fish, fish au gratin), *Vegetables* (roast potatoes, grilled vegetables, tomatoes au gratin), *Pies* (lasagne, savoury pies), *Desserts* (sponge cakes, tarts). Once you have selected the function, the relative cooking mode automatically activates.

Customised cooking programs

It is possible to save manual functions and their combinations; a list of up to 36 customised programs can be saved.

Child safety lock

A particularly useful device for households with children; it locks display functions, preventing accidental activation or modification of the settings.

Blackout memory

In case of a blackout, the system automatically saves the settings.

Oven safety switch-off

It turns on automatically 4 hours after the manual cooking function starts. A buzzer sounds and the oven switches off in order to save energy and prevent overheating.

Gellius Menu

In Oderzo (in the province of Treviso), the Gellius restaurant, managed by Adriano Fumis and Alessandro Breda, boasts a Michelin star and mixes tradition and culinary innovation, welcoming its guests in a unique and sophisticated setting. The collaboration between Gellius and Barazza has given rise to the first "Autumn Creations" menu for VELVET Touch Screen ovens, a complete meal from starter to dessert that plays with Italian and regional traditions. The Gellius Menu program can be downloaded from the VELVET products section of the Barazza website.

VELVET TOUCH SCREEN OVENS

FEATURES

MICROWAVE OVEN LIFT-UP DOOR

Designed with a minimalist style, perfectly matched to the oven design; thanks to this lift-up door, the microwave oven can not be seen.

HANDLE DESIGN

In some models, the VELVET oven door has an elegant linear handle, both for traditional front opening and for side opening.

STAINLESS STEEL OVEN LINING

The lining of the ovens with automatic opening and mirror finish is also available in 18/10 type stainless steel.

AUTOMATIC SIDE-OPENING DOOR

In the side-opening door models, the door opens to the right or left from the Touch Screen display. It is easier to check the cooking process and remove the food, especially if the oven is fitted in a tall unit. When the opening angle reaches 110 degrees, the door stops through a safety locking device that avoids furniture damages.

COLOURS

BLACK

The oven door is made of black glass, a colour that primarily emits refined elegance and simplicity.

WHITE

The oven door is also made of white glass, in order to produce a pleasant minimalist visual effect.

MIRROR

The door is available in a "mirror" finish, in order to enrich and add a hint of glamour to the kitchen.

STAINLESS STEEL

This is the finish par excellence in terms of electrical household appliances, selected for its hi-tech features.

LAB

LAB is the elegant collection of Barazza ovens that stands out for its new aesthetic shape, available in 60 cm multiprogram and Touch Control and 90 cm versions. LAB ovens match perfectly with the pure, essential style of the LAB hobs and sinks, a point of reference in the category of top-of-the-range household appliances.

LAB OVENS TYPES

60 CM MULTIPROGRAM OVEN

The new digital programmer offers even higher performance and lets you automatically program start and end cooking times.

90 CM MULTIPROGRAM OVEN

The 90 cm oven, in coordination with the aesthetic line, has a very spacious oven cavity and also the new digital programmer.

60 CM TOUCH CONTROL MULTIPROGRAM OVEN

The 60 cm oven is also available in the version with Touch Control commands.

B_FREE PYROLYTIC OVEN
FEATURES

PYROLYSIS

Pyrolysis is a process that decomposes waste material using high temperatures. The oven is equipped with this special function. During the cleaning cycle, the internal temperature reaches approximately 500°C, breaking down food residue that remains within the oven cavity and which can subsequently be removed simply by using a damp cloth.

DOOR AND AUTOMATIC DOOR LOCKING

The door is made up of 4 heat reflecting glass panels to guarantee low temperatures of the external panel. It is equipped with a device that automatically blocks opening upon activation of the pyrolytic function. Pyrolytic ovens are also equipped with a specific seal, resistant to high temperatures.

DIGITAL PROGRAMMER WITH TOUCH CONTROL

It is equipped with a programmer with touch-sensitive Touch Control, that, with a single touch, allow you to define times and functions.

COOLING SYSTEM AND TANGENTIAL COOLING FAN

It maintains external temperatures within the limits as defined by the safety standards. The tangential cooling fan activates upon oven activation and remains on until the oven is turned off; it normalizes the temperature by producing a flow of cold air.

FUNCTIONS

Static oven: Top heating element + bottom heating element. For any dish, particularly suitable for baking cakes, pizzas, roasting and timbales/puddings.

Static oven ECO: Top heating element + bottom heating element. Ideal for dishes that necessitate slow, delicate cooking.

Warming oven/heating dishes: Bottom heating element. Warming biscuits, tarts and savoury pies. Heating dishes.

Grill (3 operating levels): Central top heating element. Meat of small to medium thickness and toasting bread.

Fanned grill: Central top heating element+ fan. Meat of large thickness and dishes that are particularly voluminous.

Grill (3 operating levels) + rotisserie: Central top heating element+ rotisserie. It is recommended for cooking all meats on the rotisserie.

Roasting with static oven: Central top heating element + fan + rotisserie. It is recommended for cooking voluminous meats on the rotisserie.

Fan assisted oven: Top heating element + bottom heating element + fan. Rapid and even cooking. Also recommended for biscuits and pastries.

Rapid heat up: Circular heating element + bottom heating element + fan. Reduced combination cooking times; the oven is heated in just few minutes.

Pizza/bread and rapid heat up: Circular heating element + bottom heating element + fan. Reduced combination cooking times; the oven is heated in just few minutes. It is also ideal for cooking bread and pizza.

Fan assisted multilevel oven: Circular heating element+ fan. It allows for cooking similar or different dishes arranged on up to three shelves.

Rising: Ideal for rising dough/mixture to make bread, focaccia, panettone and brioches.

Pyrolysis: Cleaning cycle: the internal temperature reaches approximately 500°C, breaking down food residue that remains within the oven cavity and which can subsequently be removed by using a damp cloth.

ECO - pyrolysis: Cleaning cycle, ideal when the oven cavity is not overly soiled.

Defrost function: Rapid and optimal operation.

Each B_FREE pyrolytic oven function has a pre-set temperature.

B_Free Collection

B_FREE COMPACT COMBI-MICROWAVE OVEN FEATURES

DIGITAL PROGRAMMER WITH TOUCH CONTROL

It is equipped with a programmer with touch-sensitive Touch Control, that, with a single touch, allow you to define times and functions.

ELECTRONIC CHILD SAFETY LOCK

A particularly useful device for households with children; it locks display functions, preventing accidental activation or modification of the settings.

EASY CLEAN OVEN LINING

The vitreous structure of the easy clean enamel makes the surfaces perfectly smooth so that cooking grease and oils simply slide off for easy cleaning.

B_FREE COMPACT COMBI-MICROWAVE OVEN BUILT-IN

Built-in B_Free compact combi-microwave oven Touch Control

- 9 functions
- 12 automatic cooking programs
- Touch control digital programmer
- microwave functions from 100 to 1000 W
- electronic child safety lock
- capacity: 36 litres
- features: easy-clean oven lining, triple glass door
- equipment: side racks, 1 internal light, 1 stainless steel shelf, easy-clean enamelled steel tray, drop-down grill, extractable turnable plate, pizza plate
- maximum temperature: 250° C
- maximum absorbed power: 3.4 kW

Accessories: 30

STAINLESS STEEL/BLACK code 1MCBFN

Extractable warming drawer

The useful warming drawer can be placed under the combi-microwave B_FREE oven. It keeps dishes warm, defrosts, allows dough/mixtures to rise, provides delicate cooking and rapidly warms tableware.

FUNCTIONS

Microwave

From 100 to 1000 W.

Defrost function

Rapid and optimal operation. There are 4 intensity levels available.

Keep warm function

It maintains the temperature constantly at 80° C, it can be modified within the range of 35° C and 100° C. Also ideal for warming serving plates.

Grill (2 operating levels)

It allows you to cook and brown dishes. It has two functions: medium or high, each with 3 intensity levels.

Grill (2 operating levels) + microwave

It allows you to rapidly cook and brown dishes.

Fan assisted oven + microwave

It further reduces cooking times.

Fan assisted oven

Cooking is comparable to a traditional electric oven.

AUTOMATIC COOKING PROGRAMS

It allows you to automatically cook dishes by simply selecting the desired cooking method and setting the weight of the food.

- P01 Heating pre-cooked products
- P02 Fresh pizza
- P03 Frozen pizza
- P04 Roast pork
- P05 Roast veal

The MICROWAVE OVEN completes the range of Barazza ovens, fusing ease of use and instant performance with a design of rigorous aesthetic purity, made of the sophisticated stainless steel finish. The extremely practical and versatile MICROWAVE OVEN lets you prepare and cook food more quickly and easily and lends itself to different installation solutions.

MICROWAVE OVEN AND WARMING DRAWER FEATURES

FRAME FOR BUILT-IN INSTALLATION

In case you would like the microwave oven to be on display, the stainless steel frame ensures perfect flush installation with the oven.

MICROWAVE OVEN LIFT-UP DOOR

The MICROWAVE can stand independently or it can be covered by any of the Barazza microwave oven lift-up doors.

DIGITAL PROGRAMMER

It is equipped with a digital programmer to manage cooking cycles. The time, the food type or function, the set cooking time and the selected weight appear on the display.

EXTRACTABLE WARMING DRAWER

The useful WARMING DRAWER can be placed under all 60 cm Barazza ovens. It keeps dishes warm, defrosts, allows dough/mixtures to rise, provides delicate cooking and rapidly warms tableware.

FUNCTIONS

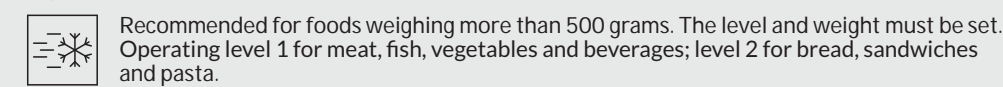

They allow you to select the function and time, or the food type.

Defrost function

Rapid and optimal operation.

Rapid defrost function

Recommended for foods weighing more than 500 grams. The level and weight must be set. Operating level 1 for meat, fish, vegetables and beverages; level 2 for bread, sandwiches and pasta.

Simmer

To cook fish and poultry and finish programs begun with cooking function.

Heating

It allows you to rapidly heat foods to the desired temperature.

Cooking

To rapidly cook food.

Low grill

To cook au gratin and brown delicate foods.

High grill

To grill meat and fish.

Microwave + grill

The microwaves provide rapid and uniform cooking. The combination with the grill lets you grill and brown food. Ideal for cooking au gratin and browning thin dishes with the help of the special removable grid.

Craquine

It allows for rapid cooking, resulting in crisp, delicious and golden brown dishes, comparable to those that come out of an electric oven; it must always be used with the craquine plate.

AUTOMATIC COOKING
PROGRAMS

After having selected the type of food, the weight and the function (defrosting, heating, cooking, grill and microwave), the oven will automatically calculate the cooking time.

OFFICINA page 136

SELECT page 126

GLASS CERAMIC page 138

Barazza makes different types of HOBBS, in terms of both aesthetics and functionality. There are gas, barbecue, Teppanyaki, induction and glass ceramic hobs, and they can be coordinated with ovens, sinks and taps of each collection. Available in several types of installation and sizes, Barazza HOBBS stand out for fitting perfectly in any kitchen environment.

HOBS

TYPES AND FEATURES

CHEF

It guarantees professional results thanks to two flame rings that distribute heat to the base of the cooking instrument. The flame is concentrated on the centre of the burner, making cooking even more rapid.

5 kW

A burner that guarantees high performance thanks to the increased power. To add cooking precision, two knobs control the 0.8 kW inner flame, or the outer 4.2 kW flame or a combination of both. Also suited for wok cooking.

DOUBLE GAS FISH BURNERS

Two flames in close proximity, whose position allows for the use of large cooking instruments distributing the heat to the base of these cooking instruments. Particularly recommended for fish-based dishes placed in oval pans.

TEPPANYAKI

Electric stainless steel hotplate with a 6 mm thickness on which you can cook meat, fish and vegetables without seasoning. The two cooking zones can be used individually or together without mixing the flavours of the different dishes. It is equipped with a thermostat and is cleaned with sparkling water and washing-up detergent using a steel brush.

INDUCTION

The heat is generated only on the bottom of the pan, transmitted directly to the food to be cooked. Thanks to a performance of 90%, times are cut significantly. The surface remains cool, making the hobs safer, avoiding burns and additionally making cleaning operations easier.

HOB STRUCTURE

With the moulded hobs, deep-drawn stainless steel drawing is purposely produced so that overflow liquids are trapped; they can be subsequently easily removed. With hobs boasting completely level surfaces, infiltration is completely avoided.

#TRIPLE RING

Three flame rings that use at best the power provided by the flame in order to ensure rapid cooking.

DUAL

A single knob is used to regulate both the internal and external dual burner flame; the burner flames can be used both individually or jointly.

BARBECUE

It is electrically operated, with lava stone, and absorbs fats and gases. The heating element is placed under the grid in order to avoid the gases formation due to contact between this element and cooking liquids. The quality is comparable to traditional cooking made on an outside grill.

GLASS CERAMIC

The glass ceramic hobs are elegant and simple, compatible with contemporary décor and easy to clean. The advanced functionality, provided by Hilight® hotplate technology, which rapidly reaches desired temperatures, allows for minimal heat loss.

EASY INSTALLATION

Barazza hobs consist of a single body that facilitates installation with tops; installation is also made easier owing to the fact that no gas regulation process is necessary; hobs operate both with methane gas and liquid gas.

HOBS

INSTALLATIONS

FLUSH (FT)

For LAB, SELECT FLAT, TAO, OFFICINA hobs. It gives perfect alignment with the top, to create a never-ending surface.

HIGH EDGE BUILT-IN (HEB)

For WOLO hob. The extra thick edge which rests on the surface bestows a marked appearance, specific to the WOLO range.

FLAT EDGE BUILT-IN (FEB)

For LAB, SELECT FLAT, TAO, OFFICINA hobs. The edge is perceptible only to the touch and facilitates installation.

LOWERED EDGE BUILT-IN (LEB)

For SELECT hobs. The edge rounds off with an oblique angle.

SQUARE EDGE BUILT-IN (SQEB)

For B_FREE hobs. The curved edge rests on top.

BEVELLED GLASS EDGE BUILT-IN (BGB)

The glass edge rounds off with an oblique 45° angle, enriching the aesthetic feel of the 30 and 60 cm INDUCTION and GLASS CERAMIC hobs.

FLAT GLASS EDGE BUILT-IN (FGB)

For 40, 90 and 120 cm INDUCTION hobs. The linearity of the glass is highlighted by the built-in installation which brings out its thickness.

GAS HOBS FEATURES

STAINLESS STEEL OR CAST IRON PAN SUPPORTS

Made of cast iron, just like those used in professional kitchens, they are particularly solid, resistant to heat and therefore long-lasting. They improve the distribution and maintenance of heat. Special rubber tips ensure stability and prevents scratches to the surface. LAB hobs are also available in the elegant version with stainless steel pan supports and burner caps.

AUTOMATIC IGNITION AND RAPID SAFETY VALVE

Turning on and regulating can be achieved in a single action using the knob. With all Barazza gas hobs, the spark plus is placed inside the burner, under the cover, away from liquids which may drip from cooking instruments and from any damage which may be caused during cleaning operations. The rapid safety valve blocks the gas flow, even with the tap open, in case the flame accidentally goes out. It is activated when the burner is alighted and thanks to the rapid thermocouple, it takes just few seconds to function.

ECO-FLAME

Burners with steady flames and hotplates which provide high heat yields accompany Barazza gas hobs; they optimise energy consumption and reduce toxic substance emissions by more than 50% when compared to the details established by the Norms.

EXTRACTABLE ONE-PIECE BURNERS

Barazza gas hobs are equipped with easily extractable one-piece burners, greatly facilitating cleaning operations.

AIR INLET

Barazza gas hob burners draw in the air necessary for combustion from above, therefore avoid the instance where unit/furniture apertures instigate air flow that may affect normal operation.

CAST IRON WOK ADAPTER

It allows for the use of woks for frying, stewing, sautéing, braising or steam cooking. Suited for triple ring and 4 and 5 kW double ring burners.

GRILL

Ideal for grilling meat, fish and vegetables. It can be used with B_FREE and OFFICINA gas hobs.

INDUCTION HOBS FEATURES

#1 TOUCH CONTROL COMMANDS

The touch-sensitive Touch Control allow you to individually regulate each cooking zone.

BOOSTER FUNCTION

It further reduces the cooking time of the single cooking zone by raising the temperature to the maximum for 10 minutes and then bringing this temperature down to standard level. It is useful for rapidly heating large quantities of liquids.

TIMER

It allows the time setting of automatic deactivation of the selected cooking area.

COOKING INSTRUMENTS (SAUCEPANS, PANS ETC.)

To ensure that induction hobs function correctly, we recommend using cooking instruments with a flat base made of 410 type stainless steel, similar types, or, at least, with high metal content, which have a manufacturer's symbol indicating that they are suitable for induction cooking (aluminium, glass, terracotta or ceramic instruments are not recommended).

INDUCTION HOBS FEATURES

SAFETY DEVICES

Selective detection of cooking instrument

D The induction hotplate will only function if the hob recognises the presence of a suitably sized metal cooking instrument, that gives off a magnetic field, thus preventing other metal objects left on the hob by accident from causing it to switch on. The magnetic field is restricted to the surface of the base, keeping the temperature low in the surrounding area and enabling any spilt food to be removed easily.

Electronic child safety lock

L The control locking device avoids accidental activation of hobs by children and during cleaning operations.

Residual heat indicators

H The symbol H on the display indicates the presence of residual heat, generated by the heat radiated at the base of the cooking instrument.

Anti-overheating system

In the instance of overheating, the temperature automatically lowers thanks to a sensor that detects any overheating on all hob components.

GLASS CERAMIC HOBS FEATURES

HOTPLATES AND TOUCH CONTROL

The hotplates are made from a circular halogen lamp and a central Hilight® heat radiant. They ensure immediate notable results, uniform heat distribution, excellent performance in terms of rapid cooking using a high heat, for example with frying and boiling. The touch-sensitive Touch Control allow you to individually and precisely regulate each cooking zone.

TIMER

T It allows the time setting of automatic deactivation of the selected cooking area.

SAFETY DEVICES

Electronic child safety lock

L The control locking device avoids accidental activation of hobs by children and during cleaning operations.

Residual heat indicators

H The symbol H on the display indicates the presence of residual heat.

Anti-overheating system

In the instance of overheating, the temperature automatically lowers thanks to a sensor that detects any overheating on all hob components.

ADVANTAGES OF USING INDUCTION HOBS

- # High performance and minimal heat loss.
- # Limited energy consumption for the time period in which the cooking instrument is on the hotplate.
- # The rapid cooking times are comparable to microwave cooking: two litres of water can reach boiling point in approximately 5 minutes, with subsequent electrical energy saving.
- # Immediate heating of cooking instruments.
- # Food does not stick to the base and flavour is improved, allowing for reduced amounts of seasoning and fats.
- # The surrounding hob surface remains cool.
- # Once the cooking instrument has been removed, the relative cooking zone deactivates: the risk of leaving the area activated and the risk of accidentally activating areas upon contact with small metal objects, are therefore avoided.
- # Peace and quiet, owing to the fact that the hob does not generate any noise.
- # Easy cleaning thanks to the smooth and airtight surface; nothing is able to stick to it.
- # Aesthetically pleasant.

B_FREE HOBS TYPES

CHEF

It guarantees professional results thanks to two flame rings that distribute heat to the base of the cooking instrument. The flame is concentrated on the centre of the burner, making cooking even more rapid.

5 kW

A burner that guarantees high performance thanks to the increased power. To add cooking precision, two knobs control the 0.8 kW inner flame, or the outer 4.2 kW flame or a combination of both. Also suited for wok cooking.

INDUCTION

With induction the heat is generated only on the bottom of the pan, transmitted directly to the food to be cooked. By virtue of a 90% performance, cooking times are notably reduced. The surface of the hob stays cool to guarantee increased safety and make cleaning easy.

BARBECUE

It is electrically operated, with lava stone, and absorbs fats and gases. The heating element is placed under the grid in order to avoid the gases formation due to contact between this element and cooking liquids. The quality is comparable to traditional cooking made on an outside grill.

TEPPANYAKI

Electric stainless steel hotplate with a 6 mm thickness on which you can cook meat, fish and vegetables without seasoning. It is divided into two cooking zones which can be used individually or jointly, without mixing the flavours of the different dishes. It is equipped with a thermostat and can be easily cleaned with a small quantity of sparkling water and washing-up detergent, using a stainless steel brush.

B_FREE HOBS
FEATURES

FULL AESTHETIC RANGE COORDINATED WITH B_FREE AND EASY SINKS

The full range is made up of domino hobs and 60, 70, 90 and 100 cm versions with burners in line. B_FREE hobs also enable perfect combination with B_FREE and EASY sinks as they have the same type of edge.

Touch Control Commands and Hilight hotplates

The hotplates are made from a circular halogen lamp and a central Hilight® heat radiant. They ensure immediate notable results, even heat distribution, excellent performance in terms of rapid cooking using a high heat, for example with frying and boiling. The touch-sensitive Touch Control allow you to individually and precisely regulate each cooking zone.

An exclusive collection of Barazza COOKER HOODS made entirely of extra thick stainless steel. High performance is assured thanks to the use of powerful and silent engines. Lighting with LED light bar completes their elegance and functionality.

COOKER HOODS
GENERAL FEATURES

The original collection of Barazza COOKER HOODS comes in different model types in stainless steel with engines of unmatched technical efficiency. Each cooker hood is made to best meet requirements of space and functionality: wall, island, ceiling, built-in canopy and downdraft. The refined aesthetics of the COOKER HOODS mean that they can be perfectly coordinated in terms of shapes and materials with all Barazza products.

- # STAINLESS STEEL

The whole structure of the cooker hood and the elements that compose it are in AISI 304 stainless steel.
- #1 DESIGN STEEL FILTERS

The filters are made of AISI 304 stainless steel and stand out for their particular and refined design.
- # FILTER SATURATION INDICATOR

A warning light and buzzer indicate when the filters are full.
- #2 LED LIGHT BAR

Barazza COOKER HOODS are equipped with an elegant, functional LED light bar; long-lasting and efficient, it cuts energy consumption.
- # AUTOMATIC START-UP AT 40° C

The cooker hood starts automatically as soon as the temperature passes 40°C.
- #3 HEIGHT TO MEASURE

Barazza offers the option of customising the height of the hose on some types of COOKER HOOD.
- # ENGINE POWER

Barazza COOKER HOODS have an air-flow of 1,000 cubic metres per hour.
- # REMOTE ENGINE

The remote engine can be installed on all COOKER HOODS upon request.
- # RECIRCULATING FUNCTION

By selecting this function, at any hour, the cooker hood switches on for 10 minutes at the second speed, ensuring optimum air circulation.
- # REMOTE CONTROL

The remote control, optional on request, is available with some types of cooker hood. It lets you activate the LED bar light and select the desired speed.

B_ONE

B_ONE is the stainless steel cooker hood also produced with a hose to measure, available in the wall-mounted or island versions. Unique of its type, it represents innovation in the kitchen landscape.

B_ONE COOKER HOODS WALL

75 cm B_One wall cooker hood for 90 module

- AISI 304 stainless steel
- optional filter extraction
- speeds: 3 + intensive speed
- air-flow: 1000 m³/h
- pressure 520 Pa
- noise level 62 Lw(dBA)
- duct exit: ø 150 mm (+ reducer ø 120 mm)
- lighting: LED light bar
- stainless steel filters
- functions: automatic start-up at 40° C, filter saturation indicator, recirculating function
- remote control included
- maximum absorbed power: 0.3 kW

Advice for installation

B_TOP

B_TOP is the stainless steel cooker hood, created with a wall-mounted telescopic hose that can be quickly adapted to different outlet heights, allowing a range from 69 to 100 cm. An attractive and technically versatile element.

B_TOP COOKER HOODS WALL

B_Top wall cooker hood for 90 module

- AISI 304 stainless steel
- optional filter extraction
- speeds: 3 + intensive speed
- air-flow: 1000 m³/h
- pressure 520 Pa
- noise level 62 Lw(dBA)
- duct exit: ø 150 mm + reducer ø 120 mm
- lighting: LED light bar
- stainless steel filters
- functions: automatic start-up at 40° C, filter saturation indicator, recirculating function
- remote control: optional
- telescopic hose
- maximum absorbed power: 0.3 kW

STAINLESS STEEL H69 ÷ 100 cod. 1KBTMP9

B_Top wall cooker hood for 120 module

- AISI 304 stainless steel
- optional filter extraction
- speeds: 3 + intensive speed
- air-flow: 1000 m³/h
- pressure 520 Pa
- noise level 62 Lw(dBA)
- duct exit: ø 150 mm + reducer ø 120 mm
- lighting: LED light bar
- stainless steel filters
- functions: automatic start-up at 40° C, filter saturation indicator, recirculating function
- remote control: optional
- telescopic hose
- maximum absorbed power: 0.3 kW

| Remote control | cod. 1RC |

Telescopic hose

The height of the hose can be adapted based on your specific requirements.

Advice for installation

B_AMBIENT

B_AMBIENT is the innovative stainless steel ceiling cooker hood whose cutting-edge design significantly increases the field of vision and acts as a lighting element, thus offering important advantages in terms of practicality and aesthetics.

B_AMBIENT COOKER HOOD CEILING

B_Ambient ceiling cooker hood for 120 module

- AISI 304 stainless steel
- optional filter extraction
- speeds: 3 + intensive speed
- air-flow: 1000 m³/h
- pressure 520 Pa
- noise level 62 Lw(dBA)
- duct exit: ø 150 mm + reducer ø 120 mm
- lighting: LED light bar
- stainless steel filters
- functions: filter saturation indicator, recirculating function
- remote control included
- maximum absorbed power: 0.3 kW
- 117x47.6 cm cut-out

STAINLESS STEEL H 30 cod. 1KBAS12

Accessories

Charcoal filter cod. 1FC1

Perimeter extraction

Perimeter extraction is an innovative system in the cooker hood, which is made up of a panel that allows transition of the air from the edges. Perimeter extraction brings great aesthetic and technical advantages: the cooker hood has no air input hole and that permits complete creative freedom at the design stage; the extraction speed is increased thanks to the reduction in the extracting area (Venturi effect); the panel slows down the flow of air to make the system quieter. Unlike traditional anti-grease filters, the panel has a smooth surface that makes daily cleaning easy.

Remote control included

Advice for installation

B_DRAFT

B_DRAFT, the retractable stainless steel cooker hood, is the perfect solution to optimise functionality and aesthetics in kitchen areas.

B_DRAFT COOKER HOODS DOWNDRAFT

B_Draft downdraft cooker hood for 90 module

- AISI 304 stainless steel
- optional filter extraction
- speeds: 3 + intensive speed
- air-flow: 1000 m³/h
- pressure 500 Pa
- noise level 67 Lw(dBA)
- duct exit: ø 150 mm + reducer ø 120 mm
- lighting: LED light bar
- stainless steel filters
- filter saturation indicator
- remote control included
- maximum absorbed power: 0.3 kW
- 85.8x9.8 cm cut-out - flush: see website

Height 50 cm

The B_DRAFT cooker hood can reach a height of 50 cm which ensures excellent extraction.

B_COVER

B_COVER is the stainless steel cooker hood designed to be used inside hanging units, typically in kitchen canopy modules, an excellent symbiosis of aesthetics and convenience. B_COVER is available in different sizes with 60, 90 and 120 cm modules.

B_COVER COOKER HOODS BUILT-IN CANOPY

B_Cover built-in canopy cooker hood for 60 module

- AISI 304 stainless steel
- optional filter extraction
- speeds: 3 + intensive speed
- air-flow: 1000 m³/h
- pressure 520 Pa
- noise level 62 Lw(dBA)
- duct exit: ø 150 mm + reducer ø 120 mm
- lighting: LED light bar
- stainless steel filters
- functions: automatic start-up at 40° C, filter saturation indicator, recirculating function
- automatic start-up on the opening door
- maximum absorbed power: 0.3 kW

STAINLESS STEEL H34

B_LEVEL page 186

LAB page 172

SELECT page 188

B_FREE page 178

TAO page 196

Barazza SINKS stand out for their advanced aesthetic style and completely ergonomic design. They offer great functionality and a widely differentiated range, single or double bowl, with or without drainer, available in different shapes and sizes. Barazza SINKS are entirely made of stainless steel and guarantee maximum hygiene and resistance to corrosion.

SINKS

GENERAL FEATURES

EXTRA THICK STAINLESS STEEL

Barazza sinks use extra thick AISI 304 stainless steel that is completely recyclable, resistant to corrosion, does not degrade over time and is extremely hygienic.

MIXER TAP HOLE

Barazza sinks come ready with a 3.5 cm hole for the mixer tap, thus eliminating the need to drill a hole through the kitchen top. Many models may be customised upon request, adding a second or third hole which are required for the addition of a remote control or, alternatively, of the practical soap or detergent dispenser.

ROUND BASKET STRAINER WASTE

Barazza basket strainer waste plus are approved by LGA that certifies 100% conformity with Norm EN274. Stronger, thanks to the increased thickness of the stainless steel and plastic materials, they are equipped with seals that ensure the water remains in the bowl, always acting 100% in compliance with the Norm, even in case of a dirty bowl. Maximum water-tightness even in the joining between the trap and the basket strainer waste, whose screw, in order to avoid deformation of plastic components owing to thermal shock, is protected by a brass bushing. The 3.5" basket strainer waste allows the Barazza waste disposers to be used (compatibility with other manufacturers' waste disposers is not guaranteed).

SQUARE BASKET STRAINER WASTE

Some bowls are equipped with square basket strainer waste plus, matched to the bowls and perimeter overflow.

POP-UP PLUG

It allows you to empty the bowl without having to place your hands inside the bowl. Useful for avoiding splashing or burning yourself, in case the water is hot.

OVERFLOW

The device is provided with all Barazza sinks and is a safety feature in case taps are left running. Dependent on the aesthetic design of the sink, the overflow may have slots or perimeter target.

CAPACIOUS BOWLS

The extra thick stainless steel sinks have very large capacious bowls.

REVERSIBLE SINKS

Some sinks are reversible or can be installed with the drainer on the right or the left.

SPACE-SAVER TRAP

Reduced size trap allows easier use of the space under the sink.

SINKS

INSTALLATIONS

FLUSH (FT)

For EASY, LAB, SELECT FLAT and TAO. It gives perfect alignment with the top, to create a never-ending surface.

LOWERED EDGE BUILT-IN (LEB)

For EASY, B_OPEN, B_FAST, B_LEVEL and SELECT sinks. The edge rounds off with an oblique angle.

FLAT EDGE BUILT-IN (FEB)

For EASY, LAB, SELECT FLAT and TAO sinks. The edge is perceptible only to the touch and facilitates installation.

SQUARE EDGE BUILT-IN (SQEB)

For EASY and B_FREE sinks. The curved edge rests on top.

STANDARD EDGE BUILT-IN (SEB)

For B_FAST corner sink.

LAB SINKS FEATURES

SINKS WITH RADIUS "0"

LAB sinks are available with elegant radius "0" bowls.

POP-UP PLUG

LAB sinks are equipped with a pop-up plug that allows you to empty the bowl without having to place your hands inside it. Useful for avoiding splashing or burning yourself, in case the water is hot.

MATCHING ACCESSORIES

The programme proposes a complete set of aesthetically matching taps and functional accessories, including sliding accessories, characterised by the advanced design synonymous with Barazza's perfect style.

SQUARE BOWLS

SQUARE BOWLS R. "15" p. 204

SQUARE BOWLS R. "12" p. 208

SQUARE BOWLS R. "0" p. 210

A wide range of modular SQUARE BOWLS, available in different compositions; each bowl can be selected according to individual taste and can be freely matched to all Barazza products.

Barazza SQUARE SINKS come in a wide selection of sizes, varied radius types and with different installation solutions, flush, built-in and undermounted; a wide range of matching taps is also available.

SQUARE BOWLS FEATURES AND INSTALLATION

ROUND BASKET STRAINER WASTE

Barazza basket strainer waste plus are approved by LGA that certifies 100% conformity with Norm EN274. Stronger, thanks to the increased thickness of the stainless steel and plastic materials, they are equipped with seals that ensure the water remains in the bowl, always acting 100% in compliance with the Norm, even in case of a dirty bowl. Maximum water-tightness even in the joining between the trap and the basket strainer waste, whose screw, in order to avoid deformation of plastic components owing to thermal shock, is protected by a brass bushing. The 3.5" basket strainer waste allows the Barazza waste disposers to be used (compatibility with other manufacturers' waste disposers is not guaranteed).

SQUARE BASKET STRAINER WASTE

Some bowls are equipped with square basket strainer waste plus, matched to the perimeter overflow.

OVERFLOW

The device is provided with all Barazza bowls and is a safety feature in case taps are left running. Dependent on the aesthetic design of the sink, the overflow may have slots or perimeter target.

RADIUS "15"

RADIUS "12"

RADIUS "0"

The bowls can have three types of exclusive radius: Radius "15", Radius "12", Radius "0".

FLAT EDGE BUILT-IN (FEB)

The edge is perceptible only to the touch and facilitates installation.

FLUSH (FT)

It gives perfect alignment with the top, to create a never-ending surface.

BUILT-IN UNDERMOUNTED (ST)

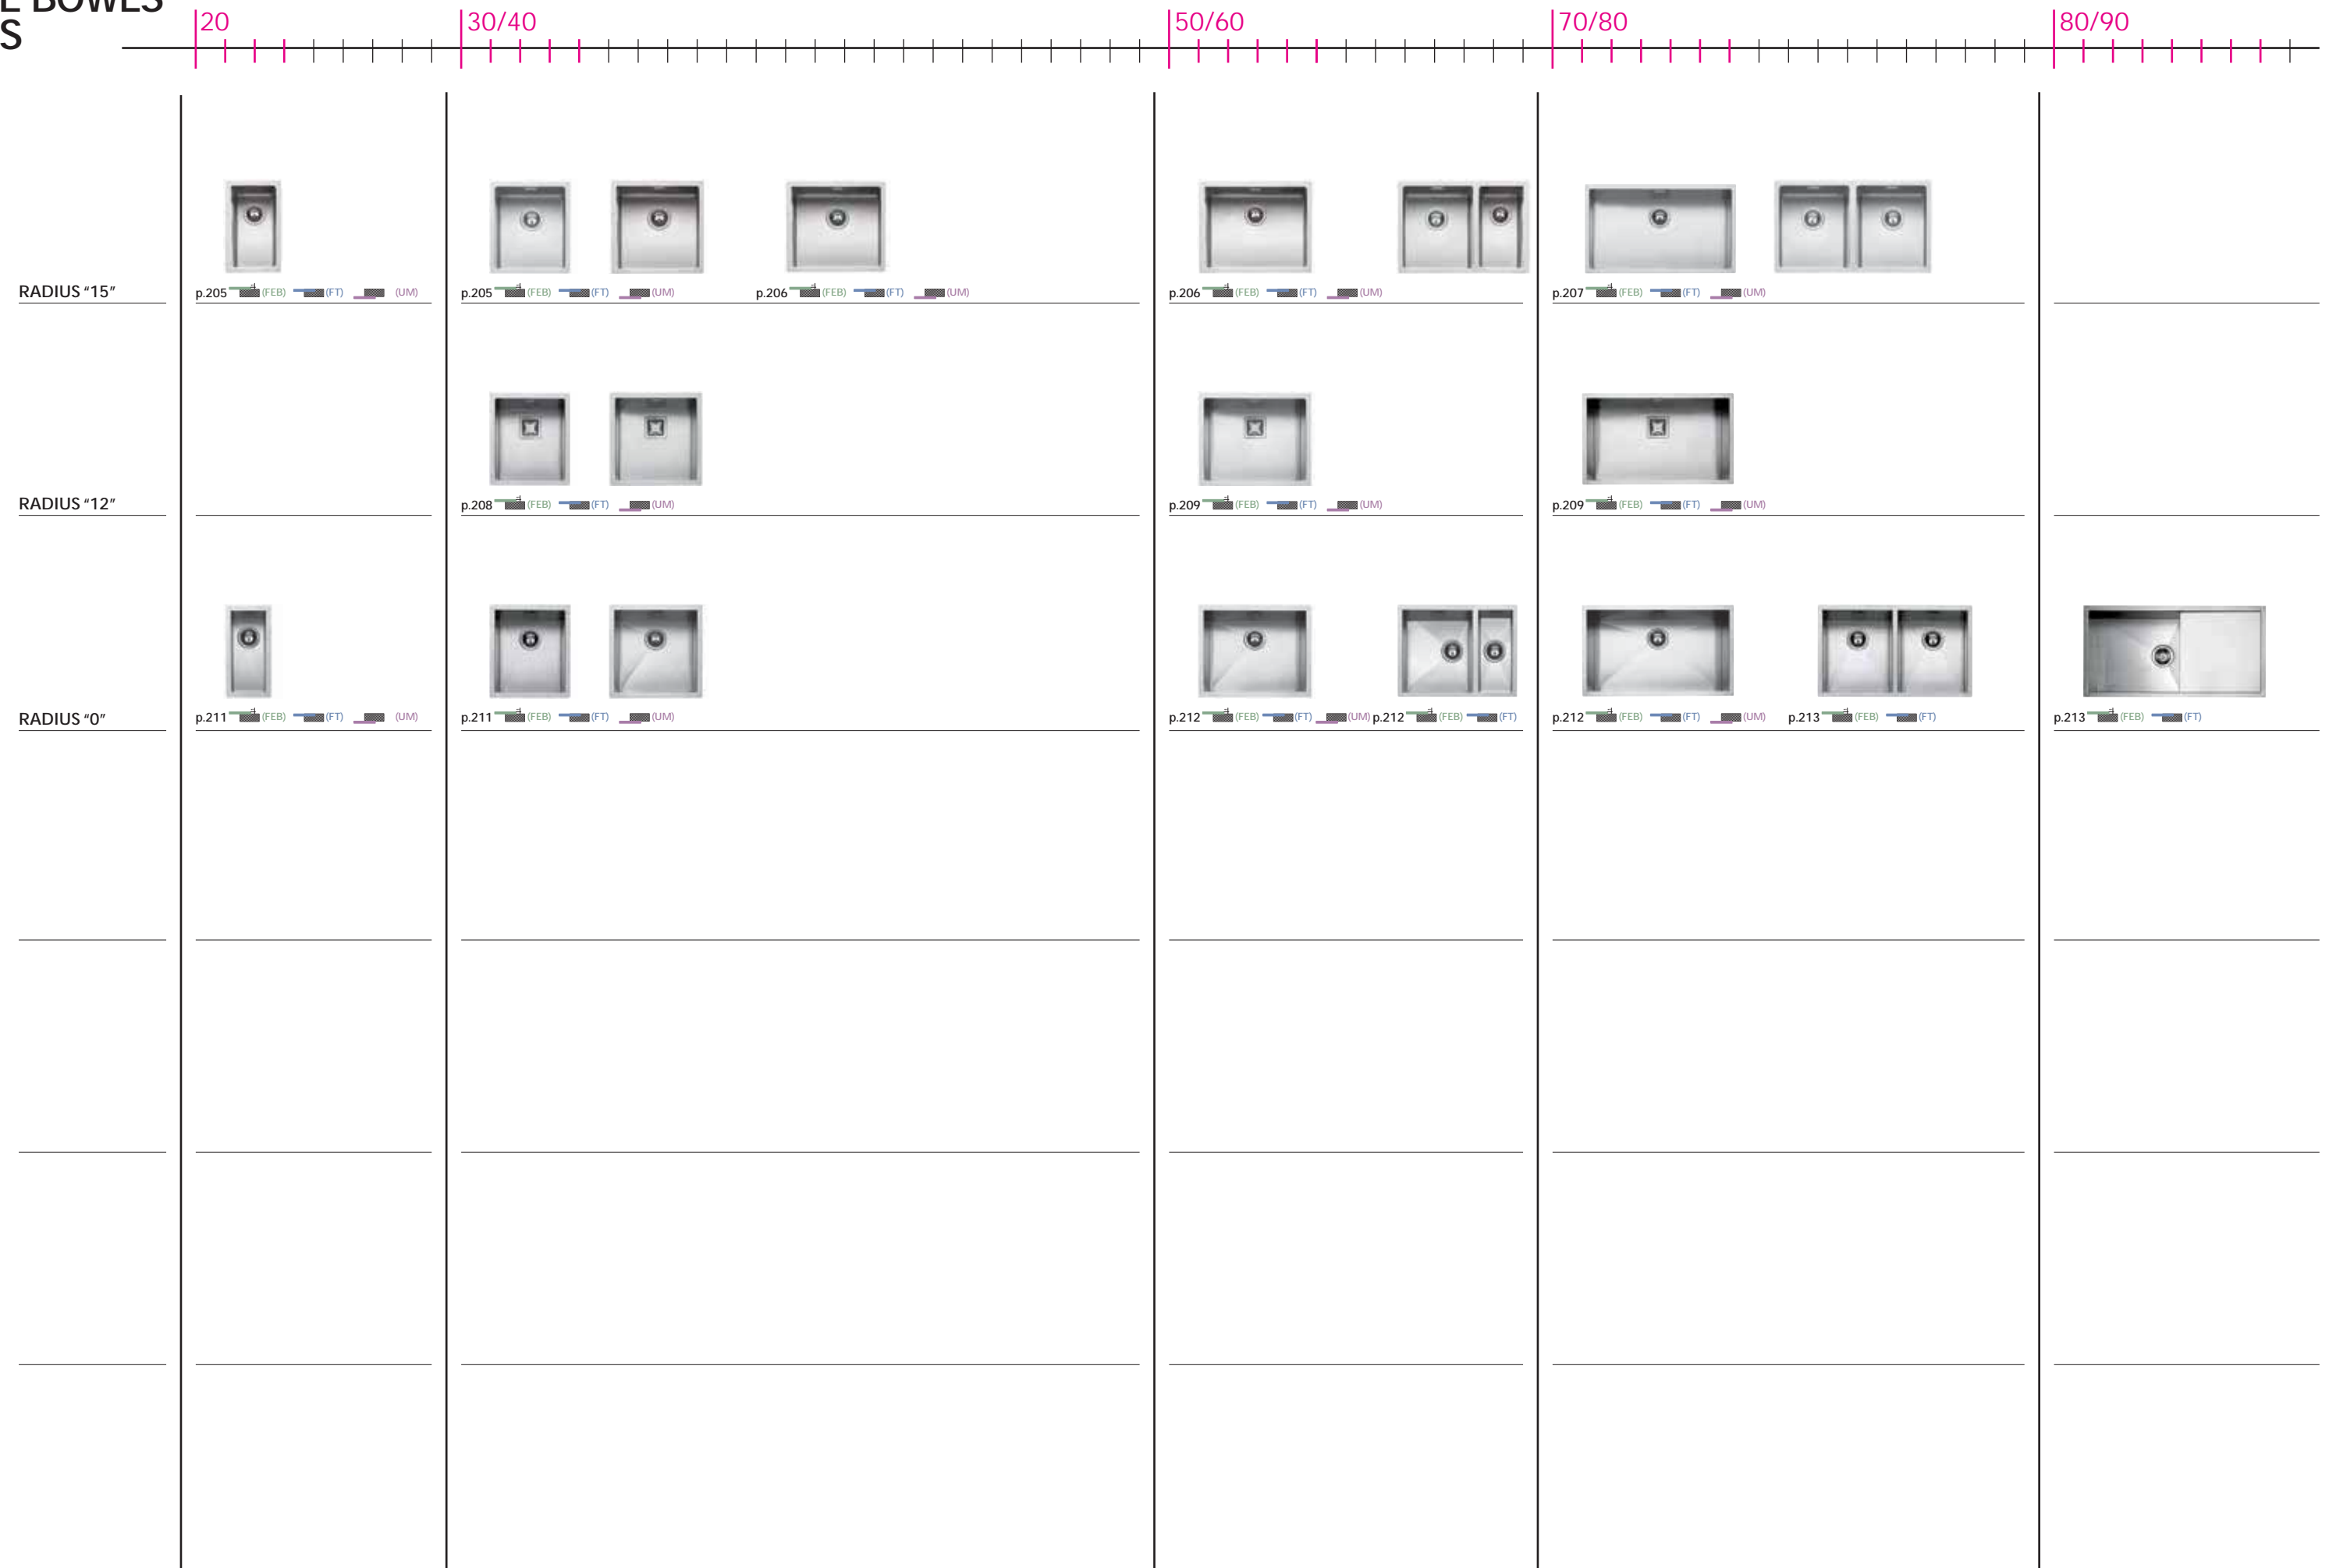

The sinks are elegantly installed underneath the work surface.

Built-in double square bowl sink with radius "15" with Flexi mixer tap.

SQUARE BOWLS MODULES

SQUARE BOWLS R."15"

The SQUARE RADIUS "15" SINKS are functional and ergonomic, which makes them easy to clean without compromising design; they have a perimeter overflow.

Glass 3-way mixer tap

GLASS is the 3-way mixer tap entirely made of AISI 304 stainless steel that combines two functions in one: supply of purified water and ordinary water from the mains. You can use filtered, purified water only when necessary. It's an economical, ecological and safe system, designed to guarantee water that is always pure by eliminating limescale and chlorine residues, which cause unpleasant smells. It respects the environment because it slightly reduces the use of plastic, does not waste water and lets you make savings in total safety.

GLASS is practical, unobtrusive and beautifully integrated. No special installation is required. All the technology is enclosed in a cartridge which can be quickly replaced, easily and without any tools or the intervention of a specialist engineer. Each cartridge delivers 3000 litres of very pure water. The timer supplied with each cartridge warns you when it is necessary to replace the cartridge.

The two flows are kept apart so that the filtered and purified water remains separate throughout its path.

STAINLESS STEEL

Stainless steel has a high level of chromium and nickel and is resistant to rusting and staining. There are different types of stainless steel; Barazza products are made of AISI 304 stainless steel (U.S. mark: American Iron and Steel Institute), containing 18% of chromium and 10% of nickel, that give steel its anti-corrosive and antibacterial properties.

- For a perfect maintenance Barazza recommends:
- # To rinse well with water after use and to dry with a clean cloth or a chamois leather cloth.
 - # Not to use detergents containing chlorine and its by-products, as muriatic acid or bleach.
 - # It is suggested to use a little warm white vinegar, only for persistent stains.
 - # Not to use steel wool or abrasive materials, that would irreparably scratch the surface.
 - # Not to drag hot pots on the top. To use chopping boards, potholders and mats while working in the kitchen.
 - # Not to place hot pots and ovens on the top in order to avoid buckling and blueing.
 - # Not to leave rusty metal objects on the surface for a long time.
 - # Not to leave open packets or bottles of detergents or other chemical substances near the product.

EASY CLEAN CLEANING CREAM

EASY CLEAN is a creamy cleaner developed exclusively for cleaning sinks, hobs, cooker hoods, ovens and stainless steel surfaces in general. Formulated with top-quality ingredients, it is rich in polishing pigments and conditioning substances. It treats stainless steel gently, effortlessly removing limescale and grease stains. Used periodically or as necessary, it restores lustre to the surface and forms a protective shield that delays tarnished appearance or dirt deposits.

EASY CLEAN MICROFIBRE CLOTH

Barazza professional EASY CLEAN microfiber cloth is degreaser and absorbent and removes all types of stains from any stainless steel surface and not, without leaving streaks and lint, without the use of chemical detergents. The innovative product is characterized by an extraordinary softness and durability that make it indispensable for every-day cleaning.

CLASSIC COLLECTION

90 / 123 CM COOKER page 242

90 / 123 cm COOKER HOOD page 248

90 / 123 cm SPLASH BACK page 248

123 cm SINK-BLOCK page 250

The Classic Collections, with its traditional style, is made up of 90 cm and 123 cm cookers and the 123 cm sink-block. In every element the refined combination between the finishes, the steel and the ivory, burgundy and anthracite enamels, guarantees a prestigious line with sweet and strong characteristics.

90 AND 123 CM COOKERS FEATURES

FORMAL AND ELEGANT STYLE FOR CLASSIC, RUSTIC OR MODERN KITCHENS
Barazza cookers and sink-block are realized with first quality material, strong and unalterable as stainless steel, iron and brass. The splash back that joins the cooker hood and the cooker is functional and elegant, like the different accessories studied for add value on the collection. The breadth between the hob, the oven and the lower stainless steel drawer represents comfortableness and handiness; moreover it shows the research and the accuracy that Barazza use to design his products.

90 CM MULTIFUNCTION OVEN

Oven with 90' mechanical timer with buzzer and manual start/end cooking timer with 7 cooking functions: static oven, warming oven, browning oven, traditional grill, fan-assisted oven, fanned grill, defrost function.

TYPES OF HOBS

The hobs of the Classic Collection's cookers are available in these formats: 4 gas and 2 triple rings and 3 gas, triple ring and fish burner for 90 cm version and 3 gas, 2 triple rings and Fry Top for 123 version.

90 AND 123 CM COOKERS FEATURES

#1 SIDE DOOR
The 123 cm cooker has a side door with extractable stainless steel drawers equipped with plate-rack, spice-rack, iroko chopping boards holders and bottles holder.

#2 EXTRACTABLE DRAWER
All the cookers have a practical stainless steel lower drawer that can be pulled out.

#3 LARGE COOKER HANDLE
You can choose between the versions with or without large stainless steel or brass handle.
